CORROSION—1986 Index

This index to the 12 issues of CORROSION published in 1986 includes the technical contents of each issue, an alphabetical subject index, and an alphabetical author index. To locate information published during 1986, refer to the month and page number indicated. Reprints of articles published in CORROSION are available from NACE, P.O. Box 218340, Houston, TX 77218.

CORROSION—Technical Contents Index, Volume 42, 1986

JANUARY

Corrosion Behavior of Austentic Weld and Clad Metals in Accelerated Boiling Acid Tests Simulating Passive Conditions
K. Prasad Rao, S. Prasanna Kumar 1

Application of a Slip Dissolution-Repassivation Model for Stress Corrosion Cracking of AISI 304 Stainless Steel in Boiling 42% $MgCl_2$ Solution
T. Nakayama, M. Takano 10

The Effect of Microstructure on the Corrosion and Stress Corrosion Cracking of Alloy 600 in Acidic and Neutral Environments
C. L. Briant, C. S. O'Toole, E. L. Hall 15

Composition-Based Correlations to Predict Sensitization Resistance of Austenitic Stainless Steels
S. M. Bruemmer 27

Hydrogen-Induced Cracking: Determination of Maximum Allowed H_2S Partial Pressure
K. Van Gelder, M. J. J. Simon Thomas, C. J. Kroese 36

The Electrochemical Effect of Cr, Ni, and Mo Additions on the Stress Corrosion Cracking of Austenitic Stainless Steels in a Chloride Solution
R. Oltra, J. C. Colson, A. Desestret 44

Technical Note: Hyurogen Evolution Kinetics on a High-Carbon Steel and on Tin in Seawater
R. P. Frankenthal, P. C. Milner 51

High-Strength Steels with Improved Sulfide Stress Cracking Resistance
A. Chavane, M. Habashi, G. M. Pressouyre, J. Galland 54

FEBRUARY

Stress Corrosion Cracking of ASTM A516 Steel in Hot Caustic Sulfide Solutions—Potential and Weld Effects
D. Tromans, S. Ramakrishna, E. B. Hawbolt 63

Some Observations on Corrosion of Carbon Steel in Aqueous Environments Containing Carbon Dioxide
G. I. Ogundele, W. E. White 71

Galvanic Corrosion Prediction Using Long- and Short-Term Polarization Curves
H. P. Hack, J. R. Scully 79

The Dissolution and Passivation of a Single-Crystal $Ni_{50}Fe_{50}$ Alloy and the Influence of Sulfur Studied by Electron Spectroscopy for Chemical Analysis
P. Marcus, I. Olefjord 91

Intergranular Stress Corrosion Cracking Damage Model: An Approach and its Development for Alloy 600 in High-Purity Water
Y. S. Garud, A. R. McIlree 99

A New Electrochemical Potentiokinetic Reactivation Test for Determining Degree of Sensitization in Ferritic Stainless Steels
J. B. Lee 106

Technical Note: The Influence of Sulfide Inclusions on the Initiation of Pits in Fe-29Ni-17Co
W. R. Cieslak 111

Characterization of Corrosion Products on Cupronickel 70:30 Alloy in Sulfide-Polluted Water
N. Mukhopadhyay, S. Baskaran 113

Technical Note: A Procedure for the Mounting of FeCrNiMo Alloy Electrodes for Electrochemical Measurements
S. A. Bombaci, R. J. Taylor 118

Technical Note: Corrosion Potential Measurements in Boiler Water: The Influence of Oxygen Content
G. A. A. van Osch, W. M. M. Huijbregts 120

MARCH

Whitney Award Lecture—1985 On the Roles of Corrosion Products in Local Cell Processes
H. W. Pickering 125

On the Conduction Mechanisms of Passive Films on Molybdenum-Containing Stainless Steel
A. Irhzo, Y. Segui, N. Bui, F. Dabosi 141

The Influence of Silicon on the Pitting Corrosion Resistance of an 18Cr-8Ni Stainless Steel
B. E. Wilde 147

A Noniterative Method for Determining Corrosion Parameters From a Sequence of Polarization Data
V. Feliu, S. Feliu 151

Corrosion Behavior of Nickel in Methanol
D. D. N. Singh, M. K. Banerjee 156

A Comparison of the General and Localized Corrosion Resistance of Conventional and Rapidly Solidified AISI 303 Stainless Steel
P. C. Searson, R. M. Latanision 161

Effects of Transients in Water Chemistry, Temperature, and Loading on Intergranular Stress Corrosion Cracking of AISI 304 Stainless Steel
P. L. Andresen 169

Evaluation of Chemical and Electrochemical Etching Techniques to Determine Phosphorus Segregation in NiCrMoV Rotor Steels
S. M. Bruemmer 180

APRIL

The Influence of Microstructure on the Corrosion Properties of Hot-Dip Galvanized Reinforcement in Concrete
E. Maahn, B. Sorensen 187

The Effect of Nitrogen on Stress Corrosion Cracking of AISI 304 Stainless Steel in High-Temperature Sulfate Solution
T. A. Mozhi, K. Nishimoto, B. E. Wilde, W. A. T. Clark 197

Reversible Acceleration of the Corrosion of AISI 304 Stainless Steel Exposed to Seawater Induced by Growth and Secretions of the Marine Bacterium *Vibrio Natriegens*
D. E. Nivens, P. D. Nichols, J. M. Henson, G. G. Geesey, D. C. White 204

Studies of a Water Treatment Device That Uses Magnetic Fields
K. W. Busch, M. A. Busch, D. H. Parker, R. E. Darling, J. L. McAtee, Jr. 211

Sulfide Stress Cracking Resistance of Low-Alloy Nickel Steels
Y. Yoshino, Y. Minozaki 222

Technical Note: The Mechanism of Corrosion Inhibition by Phosphate-Based Cooling System Corrosion Inhibitors
G. Saha, N. Kurmaih 233

A Potentiodynamic Evaluation of NiMo and NiTi Amorphous Thin Films
R. S. Bhattacharya, C. N. Raffoul, A. K. Rai 236

17. D. C. Grahame, Chem. Rev., Vol. 41, p. 441, 1947.
18. N. G. Bardina, P. D. Lukovtsev, Zh. Fiz. Khim., Vol. 37, p. 1008, 1963.

D. E. Nivens, P. D. Nichols, J. M. Henson, G. G. Geesey, D. C. White 204

Studies of a Water Treatment Device That Uses Magnetic Fields
K. W. Busch, M. A. Busch, D. H. Parker, R. E. Darling, J. L. McAtee, Jr. 211

Sulfide Stress Cracking Resistance of Low-Alloy Nickel Steels
Y. Yoshino, Y. Minozaki 222

Technical Note: The Mechanism of Corrosion Inhibition by Phosphate-Based Cooling System Corrosion Inhibitors
G. Saha, N. Kurmaih 233

A Potentiodynamic Evaluation of NiMo and NiTi Amorphous Thin Films
R. S. Bhattacharya, C. N. Raffoul, A. K. Rai 236

Technical Note: The Effect of Sulfides on the Electrochemical Behavior of AISI 304 Stainless Steel in Neutral Buffered Solutions
N. B. De Cristofaro, C. A. Acosta, R. C. Salvarezza, H. A. Videla 240

Technical Note: Hydrogen Adsorption on Steels Undergoing Corrosion with Hydrogen Evolution
B. E. Wilde, C. D. Kim 243

Technical Note: Conversion of Potential vs Depth Scans Inside Cracks Into Plots of Current Density on the Walls
R. A. H. Edwards 245

MAY

Effects of Trace Elements on Corrosion in Total Immersion and Under Wet/Dry Conditions
F. Mansfeld, S. L. Jeanjaquet, M. Kendig, D. O. Raleigh, K. Fertig 249

Alternate Immersion Testing of Coated Sheet Steel
D. A. Jones, R. K. Blitz, I. Hodjati 255

Materials Behavior in Alternate (Hydrogen) Water Chemistry in the Ringhals-1 Boiling Water Reactor
L. G. Ljungberg, D. Cubicciotti, M. Trolle 263

Effect of 1-Hydroxyethylidene-1, 1-Diphosphonic Acid on the Corrosion of SS 41 Steel in 0.3% Sodium Chloride Solution
I. Sekine, Y. Hirakawa 272

Localized Corrosion of Aluminum Alloys—A Review
R. T. Foley 277

A Modified Electrochemical Technique (Electrochemical Potentiokinetic Reactivation) for Evaluating the Susceptibility of Inconel 600 to Intergranular Corrosion
A. Roelandt, J. Vereecken 289

The Environmentally Assisted Failure of Cusil in Mattsson's Solution
N. R. Sorensen 299

Technical Note: On the Composition of Anodic Corrosion Films on Nickel in the Region of Secondary Passivity
K. Carr, S. Baer, C. A. Melendres 307

JUNE

Jet Slurry Corrosive Wear of High-Chromium Cast Iron and High-Carbon Steel Grinding Ball Alloys
C. H. Pitt, Y. M. Chang 312

Correlation Between Surface Stress and Electrochemical Behavior of HSLA Steels
S. Tosto, G. Brusco, P. Tonello 318

Kinetic Studies on the Dissolution Behavior of Anodic Oxide Films on Aluminum in KF Solutions
W. A. Badawy, M. M. Ibrahim, M. M. Abou-Romia, M. S. El-Basiouny 324

Polarization Effects in Galvanic Corrosion
G. O. Davis, J. Kolts, N. Sridhar 329

Hydrogen Induced Cracking Susceptibility of High-Strength Line Pipe Steels
K. Matsumoto, Y. Kobayashi, K. Ume, K. Murakami, T. Taira, K. Arikata 337

The Use of Piezoelectric Crystals as Electrode Substrates in Iron Corrosion Studies: The Real-Time, *In Situ* Determination of Dissolution and Film Formation Reaction Rates
H. E. Hager, R. D. Ruedisueli, M. E. Buehler 345

Stress Corrosion of Age-Hardenable NiFeCr Alloys
I. L. W. Wilson, T. R. Mager 352

Slow Strain Rate Stress Corrosion Cracking of AISI 304 Stainless Steel in NaCl Solution and Its Prevention by *Controlled Cathodic Protection*
F. Mancia, A. Tamba 362

Stress Corrosion Cracking Testing of Inconel Alloys 600 and 690 Under High-Temperature Caustic Conditions
J. R. Crum 368

JULY

Plenary Lecture—1986 Effects of Alloy Composition and Microstructure on the Passivity of Stainless Steels
A. J. Sedricks 376

A Finite Difference Model Describing Carburization in High-Temperature Alloys
K. Bongartz, R. Schulten, W. J. Quadakkers, H. Nickel 390

Some Observations on the Corrosion of Carbon Steel in Sour Gas Environments: Effects of H_2S and $H_2S/CO_2/CH_4/C_3H_8$ Mixtures
G. I. Ogundele, W. E. White 398

The Silver Sulfide Reference Electrode for Use in Alkaline Sulfide Solutions
D. C. Crowe, D. Tromans 409

Effect of Germanium Additions on the Corrosion Behavior of an AlLi Alloy
E. L. Colvin, G. L. Cahen, Jr., G. E. Stoner, E. A. Starke 416

Atmospheric Corrosion Products on Al, Zn, and AlZn Metallic Coatings
J. J. Friel 422

Removal of Sulfur-Containing Inhibitor from Steel Surfaces
R. L. Tapping, J. Torok, A. E. Valvasori, R. D. Davidson, K. Kanhai 427

Discussion: On the Mechanism of Cathodic Protection
D. A. Jones 430

Technical Note: Auxiliary Electrode Method for Determination of Ohmic Resistance
P. J. Moran 432

Technical Note: An Improved Life Cu-$CuSO_4$ Reference Electrode for Field Service
Y.-J. Weng, B. E. Wilde 435

AUGUST

Electrochemical Aspects of Grinding Media-Mineral Interaction in Sulfide Ore Grinding
K. Adam, K. A. Natarajan, S. C. Riemer, I. Iwasaki 440

Characteristics of the Rust from Weathering Steels in Louisiana Bridge Spans
A. Raman, A. Razvan, B. Kuban, K. A. Clement, W. E. Graves 447

Oxygen and Corrosion Potential Effects on Chloride Stress Corrosion Cracking
W. M. M. Huijbregts 456

Effect of Exposure Time on the Polarization Behavior of Marine Alloys Under Flowing and Quiescent Conditions
J. R. Scully, H. P. Hack, D. G. Tipton 462

Influence of Hydrostatic Pressure and Salt Concentration on Aluminum Corrosion in NaCl Solutions
A. M. Beccaria, G. Poggi 470

Raman Spectroscopy of Thin Corrosion Films on Iron at 100 to 150 C in Air
T. Ohtsuka, K. Kubo, N. Sato 476

A Re-Analysis of Results From Constant Extension Rate Tests on Sensitized AISI 304 Stainless Steel
E. L. Capener, R. H. Richman 482

Technical Note: A Mechanism of Microbial Pitting in Stainless Steel
R. C. Newman, W. P. Wong, A. Garner 488

The Corrosion Behavior of Tantalum and Niobium in Hydrobromic Acid Solutions
I. Uehara, T. Sakai, H. Ishikawa, E. Ishii, M. Nakane 492

Discussion: The Role of Hydrogen on Sulfide Cracking of Low-Alloy Steels
E. Herzog 498

SEPTEMBER

Stress Corrosion Cracking Behavior of an Amorphous FeCrNiW Alloy
R. H. Jones, R. Wang 504

The Role of Oxygen Mass Transfer in the Erosion-Corrosion of Slurry Pipelines
J. Postlethwaite, M. H. Dobbin, K. Bergevin 514

A Comparison Between Grain Boundary Chromium Depletion in Austenitic Stainless Steel and Corrosion in the Modified Strauss Test
C. L. Briant, E. L. Hall 522

Effect of Chloride on the Stress Corrosion Cracking Susceptibility of Inconel X-750 in High-Temperature Water
K. Hattori, M. Tsubota, T. Okada 531

The Involvement of a Thermophilic Bacterium in Corrosion Processes
B. Little, P. Wagner, S. M. Gerchakov, M. Walch, R. Mitchell 533

An Electrochemical Test for Detecting the Intergranular Corrosion Susceptibility of a Duplex Stainless Steel
J. R. Scully, R. G. Kelly 537

Molybdate Corrosion Inhibition in Deaerated and Low-Oxygen Waters
T. R. Weber, M. A. Stranick, M. S. Vukasovich 542

Technical Note: Effect of Zinc on Corrosion Films That Form on Stainless Steel
L. W. Niedrach, W. H. Stoddard 546

Technical Note: High-Temperature pH of Dilute Ammonia and Ammonium Chloride Solutions and Mixtures with Strong Alkali
S. Barnartt 549

Technical Note: Corrosion Behavior of the IN-9021 Aluminum Alloy
W. J. D. Shaw 554

Technical Note: Effects of BF_2^+ Ion Implantation on the Corrosion Resistance of Inconel 600
J. D. Rubio, R. R. Hart, R. B. Griffin 557

Stress Corrosion Cracking of Sensitized AISI 304 Stainless Steel in High-Temperature Sodium Sulfate Solutions
K. Tanno, S. Ishizuka, S. Higuchi, N. Ohnaka 559

OCTOBER

Whitney Award Lecture—1986 Chemistry and Electrochemistry of the Hot Corrosion of Metals
R. A. Rapp 566

Electrochemical Monitoring of the Corrosion of Ni, Fe, and Their Alloys in Molten Salts
A. Nishikata, S. Haruyama 578

Effect of Loading Mode on the Hydrogen-Assisted Fracture of an Ultra High-Strength Steel
M. Takemoto 585

Stress Corrosion Cracking of CrNi Martensitic Stainless Steel in Concentrated $MgCl_2$ Solutions
Y. Yoshino 592

Effect of Organic Adsorbants on the Aqueous Stress Corrosion Cracking of AA 7075-T651 Aluminum Alloy
D. Tromans 601

Corrosion Behavior of a Graphite Fiber/ Magnesium Metal Matrix Composite in Aqueous Chloride Solution
P. P. Trzaskoma 609

Passivation of Steel in Ammonium Ethylenediaminetetraacetic Acid Solutions
W. W. Frenier, W. C. Kennedy 613

A Novel Corrosion Test Cell for Predicting the Long-Term Corrosion Behavior of Metal Aerosol Containers
W. S. Tait, J. A. Maier 622

NOVEMBER

Editorial: An Update on *Corrosion* Journal—Where Do We Stand With the Readers 632

Application of the Rotating Cylinder Electrode—E-Brite 26-1/Concentrated Sulfuric Acid
D. C. Silverman, M. E. Zerr 633

Electrochemical Behavior of Brass (CuZn 63:37) in Binary Mixtures of N, N-Dimethylformamide and Water
P. Singh, L. Bahadur, R. N. Singh 640

Hydrodynamic Effects During Electrochemical and Exposure Pitting Tests with Passive Films
J. Postlethwaite, B. Huber, D. Makepeace 646

Boundary Element Method Analysis of the Potential Field Associated with a Corroding Electrode
B. W. Cherry, M. Foo, T. H. Slauw 654

Long-Term Marine Atmospheric Stress Corrosion Tests on High-Strength AlZnMgCu Alloys
K. R. Hasse, R. C. Dorward 663

Investigation of Transient Polarization Currents During the Corrosion Fatigue of Mild Steel in 3.5% NaCl Solution
Z.-S. Tong, B.-X. Feng, M.-Q. Li, Y. Shi 669

Technical Note: Influence of Silicon on the Intergranular Stress Corrosion Cracking Resistance of 18Cr-8Ni Base Stainless Steel
B. E. Wilde 678

Stress Corrosion of High-Chromium Nickel-Base Weld Metals and AISI 316 Nuclear Grade Stainless Steel in Simulated Boiling Water Reactor Environments
A. McMinn 682

Probing Microbiologically Induced Corrosion
S. M. Gerchakov, B. J. Little, P. Wagner 689

DECEMBER

Corrosion Potentials and Corrosion Behavior of AISI 304 Stainless Steel in High-Temperature Water Containing Both Dissolved Hydrogen and Oxygen
L. W. Niedrach, W. H. Stoddard 696

Formation of an Active Electronic Barrier at Al/Semiconductor Interfaces: A Novel Approach in Corrosion Prevention
F. C. Jain, J. J. Rosato, K. S. Kalonia, V. S. Agarwala 700

Oxidation of Some Advanced Single-Crystal Nickel-Base Superalloys in Air at 2000 F (1093 C)
M. Levy, P. Farrell, F. Pettit 708

Metallurgical Variables Influencing the Corrosion Susceptibility of a Power Metallurgy SiCw/Al Composite
R. C. Paciej, V. S. Agarwala 718

On the Use of Linear Polarization Measurements for the Evaluation of Corrosion Inhibitors in Concentrated HCl at 200 F (93 C)
R. H. Hausler 729

Impedance Properties of the Passive Layer on a Titanium Electrode in a Phosphoric Acid Electrolyte
A. G. Gad Allah, A. A. Mazhar, M. S. El-Basiouny 740

CORROSION—Alphabetical Subject Index, Volume 42, 1986

A

grinding media vs sulfide ores electrical, 440
O_2 role in mass transfer in slurry, 514
slurries vs cast iron, steel grinding ball, 312

ACCELERATED LAB TESTING
clad, welded austenitic SS in boiling acid, 1
comparison of grain boundary deplet test, 522
H and O_2 vs 304 SS in hi-temp water, 696
max H_2S pressure for H cracking, 36
P segregation tests for NiCrMoV rotor, 180
polarization effects in galvanic corros, 329
potentials in boiler water vs O_2 content, 120
SCC of an amorphous FeCrNiW alloy, 504
SCC of CrNi martensitic SS in $MgCl_2$, 592
trace element infl on cyclic wet and dry, 249
velocity effects H_2SO_4 vs 26Cr-1Mo, 633
304 SCC slip dissol-repassivation mode, 10

ACIDS
Alloy 600 microstruct infl on attack, 15
clad, welded austenitic SS in boiling acid, 1
disc-cathodic protection mechanism, 430
marine bacterium accel attack on 304 SS, 204
review, localized attack on Al, 277

Acoustical nondestructive testing: loading mode infl on H-aided fracture, 585

ADSORPTION
electronic barrier at Al-semiconductor, 700
H adsorption on steels with H reaction, 242
HEDP inhibition of C steel in 0.3% NaCl, 272
organic adsorbants infl on 7075-T651 SCC, 601
P inhibitors for cooling systems, 233
review, localized attack on Al, 277

AERATION
brass attack in aprotic solvent + water, 640
corros behavior of Al IN-9021 alloy, 554
CuNi, NiAl, C steel, Ti, Zn vs seawater, 462
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
O_2 role in mass transfer in slurry, 514

AGING
Alloy 600 microstruct infl on attack, 15
SCC of age hardenable NiFeCr alloys, 352
Zn microstruct infl on steel in concr, 187

Air: spectroscopic anal thin films on Fe, 476
Aircraft industries: AlLi alloy, infl addition on Ge, 416
Alcohols: metal aerosol container corros test, 622

ALKALINE
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
silver sulfide electrode vs alk sulfides, 409

ALKALIS AND SALTS
chemistry, electrochem hot corros, 568
magnetohydrodynamic H_2O treatm device, 211

ALLOYING PREVENTION AND CONTROL
AlLi alloy, infl addition of Ge, 416
clad, welded austenitic SS in boiling acid, 1
composition infl on SS sensitization, 27
electrochem monitor in molten salt, 578
H cracking of hi-streng line pipe steel, 337
hi-streng steels-improved H_2S resistan, 54
organic adsorbants infl on 7075-T651 SCC, 601
passive film anal on 18-10 and Mo SS, 141
SCC of age hardenable NiFeCr alloys, 352
SCC of CrNi martensitic SS in $MgCl_2$, 592
SCC of In 600, 690 in hi-temp NaOH, 388
Si vs pitting of 18-8 SSs, 147
Si-carbide fiber-Al powder composite, 718
silicon infl on IGSCC of AISI 304 steels, 178
single-crystal Ni-base alloys vs 2000 F air, 708
slurries vs cast iron, steel grinding, 312
SS passivity infl by composit, microst, 376
SS and Cr, Ni, Mo vs SCC in Cl, 44
sulfide stress cracking of low-alloy SS, 222
Zn microstruct infl on steel in concrete, 187

ALUMINUM
Al oxide films dissolution in KF, 324
AlLi alloy, infl addition of Ge, 416
Al, Zn, AlZn atmos corros products, 422
chemistry, electrochem hot corros, 568
electronic barrier at Al-semiconductor, 700
review, localized attack on Al, 277
Si-carbide fiber-Al powder composite, 718
single-crystal Ni-base alloys vs 2000 F air, 708
trace element infl on cyclic wet and dry, 249

Aluminum coatings: alternate immers tests of coated steel, 255

Aluminum hydroxide: Al, Zn, AlZn atmos corros products, 422

ALUMINUM SALTS
chemistry, electrochem hot corros, 568
review, localized attack on Al, 277

ALUMINUM SULFATE
review, localized attack on Al, 277
Al, Zn, AlZn atmos corros products, 422
chemistry, electrochem hot corros, 568

ALUMINUM, WROUGHT
Al-Li alloy, infl addition of Ge, 416
AlZnMgCu alloy stress tests in sea atmos, 663
corros behavior of Al IN-9021 alloy, 554
organic adsorbants infl on 7075-T651 SCC, 601

SCC of age hardenable NiFeCr alloys, 352
SCC of CrNi martensitic SS in $MgCl_2$, 592
SS and Cr, Ni, Mo vs SCC in Cl, 44

Fracture: AlLi alloy, infl addition of Ge, 416
Freezing: field Cu-$CuSO_4$ electrode life improve, 435
Fresh aqueous on-site testing: O_2 role in mass transfer in slurry, 514

FUMES
metal aerosol container corros test, 622
spectroscopic anal thin films on iron, 476
trace element infl on cyclic wet and dry, 249

FUNDAMENTALS
chemistry, electrochem hot corros, 568
disc-cathodic protection mechanism, 430
loading mode infl on H-aided fracture, 585
single-crystal Ni-base alloys vs 2000 F air, 708
SS passivity infl by composit, microst, 376
O_2 role in mass transfer in slurry, 514

G

GALVANIC CELLS
alternate immersion tests of coated steel, 255
boundary element anal of electrode poten, 654
galvanic attack by graphite on Mg, 609
metal aerosol container corros test, 622
thermophilic bacterium accel of attack, 533

Galvanic: grinding media vs sulfide ores electrical, 440
Gas, flame welding: clad, welded austenitic SS in boiling acid, 1

GASES
chemistry, electrochem hot corros, 568
review, localized attack on Al, 277
Whitney 85 Lecture—corros products, 125

GENERAL CORROSION
Alloy 600 microstruct infl on attack, 15
clad, welded austenitic SS in boiling acid, 1

Geographical influences: weathering steel highway bridge attack, 447

GEOMETRICAL EFFECTS
AlZnMgCu alloy stress tests in sea atmos, 663
boundary element anal of electrode poten, 654
carburization of hi-temp alloys calcul, 390
SS passivity infl by composit, microst, 376
Whitney 85 Lecture—corros products, 125

GEOMETRY
conventional, quick-cooled 303 compared, 161
review, localized attack on Al, 277

Germanium: AlLi alloy, infl addition of Ge, 416
Glassy amorphous metal coatings: NiMo, NiTi amorphous thin film evalua, 236
Glassy metals: SCC of an amorphous FeCrNiW alloy, 504
Glycerine: field Cu-$CuSO_4$ electrode life improve, 435

GRAIN
AlLi alloy, infl addition of Ge, 416
Alloy 600 microstructure infl on attack, 15
carburization of hi-temp alloys calcul, 390
comparison of grain boundary deplet test, 522
corros behavior of Al IN-9021 alloy, 554
electrochem tests in 600 suscept to IGA, 289
P segregation tests for NiCrMoV rotor, 180
Si-carbide fiber—Al powder composite, 718
SS passivity infl by composit, microst, 376

GRAIN EFFECTS
AlZnMgCu alloy stress tests in sea atmos, 663
chemistry, electrochem hot corros, 568
P segregation tests for NiCrMoV rotor, 180
polarization eval of conc HCl at 93 C, 729
Si-carbide fiber—Al powder composite, 718

Graphic: polarization effects in galvanic corros, 329

GRAPHITE
field Cu-$CuSO_4$ electrode life improve, 435
galvanic attack by graphite on Mg, 609
polarization effects in galvanic corros, 329

Grinding: grinding media vs sulfide ores electrical, 440

H

Half-cells: metal aerosol container corros test, 622
Halogens: review, localized attack on Al, 277
Hardening: SCC of age hardenable NiFeCr alloys, 352

HARDNESS
grinding media vs sulfide ores electrical, 440
H cracking of hi-strength line pipe steel, 337
max H_2S pressure for hydrogen cracking, 36
Si-carbide fiber—Al powder composite, 718

Hastelloy B-2: polarization effects in galvanic corros, 329
Hastelloy B: electrochem monitor in molten salt, 578
Hastelloy C: electrochem monitor in molten salt, 578

HASTELLOY G
polarization effects in galvanic corros, 329
trace element infl on cyclic wet and dry, 249

Hastelloy N: electrochem monitor in molten salt, 578
Hastelloy X: SCC of age hardenable NiFeCr alloys, 352

HEAT AFFECTED ZONE
corros behavior of Al IN-9021 alloy, 554
H cracking of hi-strength line pipe steel, 337
metal aerosol container corros test, 622
SCC of A516 steel in 92 C caustic sulfide, 63

HEAT EXCHANGERS
magnetohydrodynamic water treat device, 211
removing S-containing inhib from steel, 427
steel passivation in ammonium EDTA sol, 613
thermophilic bacterium accel of attack, 533

HEAT TREATMENT
AlLi alloy, infl addition of Ge, 416
Alloy 600 microstructure infl on attack, 15
Cl in hi-temp water vs SCC of In X750, 531
clad, welded austenitic SS in boiling acid, 1
comparison of grain boundary deplet test, 522
composit infl on SS sensitization, 27
electrochem detect IGA on duplex SS, 537

electrochem tests in 600 suscept to IGA, 289
H cracking of hi-strength line pipe steel, 337
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
SCC of age hardenable NiFeCr alloys, 352
SCC of an amorphous FeCrNiW alloy, 504
SCC of CrNi martensitic SS in $MgCl_2$, 592
SCC of In 600, 690 in hi-temp NaOH, 368
Si-carbide fiber—Al powder composite, 718
sulfide stress cracking of low-alloy SS, 222

Heaters: thermophilic bacterium accel of attack, 533

HIGH PURITY AQUEOUS ENVIRONMENTS
Alloy 600 microstruc infl on attack, 15
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
CERT data on sensitized 304 re-analyzed, 482
Cl in hi-temp water vs SCC of In X750, 531
H and O_2 vs 304 SS in hi-temp water, 696
Ni-base weld metal infl on 316 in boiling, 662
potentials in boiler water vs O_2 content, 120
review, localized attack on Al, 277
SCC of age hardenable NiFeCr alloys, 352
silicon infl on IGSCC of AISI 304 steels, 678
thermophilic bacterium accel of attack, 533
zinc effects on SS O_2 films, 546

HIGH TEMPERATURES
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
carburization of hi-temp alloys calculat, 390
chemistry, electrochem hot corrosion, 568
polarization eval of conc HCl at 93 C, 729
SCC of an amorphous FeCrNiW alloy, 504
SCC of CrNi martensitic SS in Mg chloride, 592
SCC of In 600, 690 in high temp NaOH, 368
SCC of sensitized 304 in hi-temp Na_2SO_4, 559
silver sulfide electropde vs alk sulfides, 409
single crystal Ni-base alloys vs 2000 F air, 706
thermophilic bacterium accel of attack, 533

High voltage: passive film anal on 18-10 and Mo SS, 141
Highway construction: weathering steel highway bridge attack, 447

HOLIDAY TESTS
auxiliary electrode to measure resistanc, 432
boundary element anal of electrode poten, 654

Hot dip application metal coatings: Al, Zn, AlZn atmos corros products, 422
Hot fabrication: H cracking of hi-streng line pipe steel, 337
Hot fluxing: chemistry, electrochem hot corros, 568
Hot isotactic pressing fabrication: Si-carbide fiber—Al powder composite, 718

HUEY TESTS
Alloy 600 microstructure infl on attack, 15
clad, welded austenitic SS in boiling acid, 1
electrochem tests in 600 suscept to IGA, 289
SCC of In 600, 690 in hi-temp NaOH, 368

Humid atmospheric causes: altern immersion tests of coated steel, 255
Hydration effects: review, localized attack on Al alloy, 277

HYDROCHLORIC ACIDS
polarization eval of conc HCl at 93 C, 729
polarization effects in galvanic corros, 329

HYDROGEN EMBRITTLEMENT
disc, H role in H_2S cracking in low-alloy, 498
H adsorption on steels with H reaction, 242
H cracking of hi-streng line pipe steel, 337
hi strength steels—improved H_2S resistan, 54
loading mode infl on H-aided fracture, 585
max H_2S pressure for hydrogen cracking, 36
organic adsorbants infl on 7075-T651 SCC, 601
SCC of an amorphous FeCrNiW alloy, 504
sulfide stress cracking of low alloy steel, 222
Whitney 85 Lecture—corrosion products, 125

Hydrogen permeation test: max H_2S pressure for hydrogen cracking, 36

HYDROGEN PEROXIDE
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
steel passivation in ammonium EDTA sol, 613

HYDROGEN
alternate water chemistry tests in BWR, 263
CERT data on sensitized 304 re-analyzed, 482
H adsorption on steels with H reaction, 242
H and O_2 vs 304 SS in hi-temp water, 696
H evolution on steel, tin in seawater, 51
Nb, Ta vs hydrobromic acid solutions, 492
SCC of an amorphous FeCrNiW alloy, 504
Whitney 85 Lecture—corrosion products, 125

HYDROGEN SULFIDE
disc, H role in H_2S cracking of low-alloy, 498
H cracking of hi-strength line pipe steel, 337
hi strength steels—improved H_2S resistan, 54
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
max H_2S pressure for hydrogen cracking, 36
stainless steel microbial pitting mechan, 489
sulfide stress cracking of low alloy steel, 222
trace element infl on cyclic wet and dry, 249

Hydroxy ethildene diphosphonic acid: HEDP inhibition of C steel in 0.3% NaCl, 272

I

ILLUSTRATIONS
Alloy 600 microstructure infl on attack, 15
alternate immersion tests of coated steel, 255
conventional, quick-cooled 303 compared, 161
max H_2S pressure for hydrogen cracking, 36
Whitney 85 Lecture—corrosion products, 125

IMMERSION, CHEMICAL
Si-carbide fiber—Al powder composite, 718
trace element infl on cyclic wet and dry, 249

IMMERSION, LIQUID
AlLi alloy, infl addition of Ge, 416
CuAg SCC in ammonia solution, 299
galvanic attack by graphite on Mg, 609
resid stress on steels info on potential, 318

IMPEDANCE
auxiliary electrode to measure resistanc, 432
chemistry, electrochem hot corrosion, 568
electronic barrier at Al-semiconductor, 700
Ti passivity in phosphoric acid, 740

Impingement: slurries vs cast iron, steel grinding ball, 312

INCLUSIONS
Al oxide films dissolution in KF, 324
hi strength steels—improved H_2S resistan, 54
Si-carbide fiber—Al powder composite, 718

Incoloys 800, 800H, 801: electrochemical monitor in molten salt, 578
Indium: electronic barrier at Al-semiconductor, 700
Industrial atmospheric on-site testing: Al, Zn, AlZn atmos corrosion products, 422
Infrared light spectra: weathering steel highway bridge attack, 447

INHIBITORS
HEDP inhibition of C steel in 0.3% NaCl, 272
max H_2S pressure for hydrogen cracking, 36
Nb, Ta vs hydrobromic acid solutions, 492
organic adsorbants infl on 7075-T651 SCC, 601
phosphate inhibitors for cooling systems, 233
polarization eval of conc HCl at 93 C, 729
removing S-containing inhib from steel, 427
review, localized attack on Al alloy, 277
zinc effects on SS O_2 films, 546

Inorganic-metal multiphase coatings: polarization eval of conc HCl at 93 C, 729
Inorganic-metal multiphase materials: galvanic attack by graphite on Mg, 609

INSTANTANEOUS RATE METERS
electrochemical monitor in molten salt, 578
polarization eval of conc HCl at 93 C, 729
O_2 role in mass transfer in slurry pipeline, 514

INSTRUMENTATION
Alloy 600 microstruc infl on attack, 15
magnetohydrodynamic water treat device, 211
max H_2S pressure for hydrogen cracking, 36
metal aerosol container corrosion test, 622
test method for microbial corrosion, 669
Whitney 85 Lecture—corrosion products, 125

Insulation: electronic barrier at Al-semiconductor, 700
Insulators: electronic barrier at Al-semiconductor, 700

INTERFACE
electronic barrier at Al-semiconductor, 700
passive film anal on 18-10 and Mo SS, 141
Ti passivity in phosphoric acid, 740

INTERGRANULAR CRACKING
loading mode infl on H-aided fracture, 585
N vs 304 SCC in hi-temp sulfate solution, 197
phos segregation tests for NiCrMoV rotor, 180
SCC of age hardenable NiFeCr alloys, 352
silicon infl on IGSCC of AISI 304 steels, 678
sulfide stress cracking of low alloy steel, 222

INTERGRANULAR, LOCALIZED EFFECTS
alternate water chemistry tests in BWR, 263
clad, welded austenitic SS in boiling acid, 1
composition infl on SS sensitization, 27
electrochem detect IG attack on duplex steel, 537
electrochem tests in 600 suscept to IGA, 289
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
phos segregation tests for NiCrMoV rotor, 180
polarization eval of conc HCl at 93 C, 729
SCC of age hardenable NiFeCr alloys, 352
SCC of sensitized 304 in hi-temp Na_2SO_4, 559

Internal stresses: H cracking of hi-strength line pipe steel, 337
Iodides, bases and salts: review, localized attack on Al alloy, 277
Iodine: trace element infl on cyclic wet and dry, 249
Ion beam mixing coating application: NiMo, NiTi amorphous thin film eval, 236

ION IMPLANTATION
boron fluoride implantation of In 600, 557
NiMo, NiTi amorphous thin film eval, 236

Ion irradiation: NiMo, NiTi amorphous thin film eval, 236
Ionic causes: polarization eval of conc HCl at 93 C, 729

IONIC EFFECTS
boron fluoride implantation of In 600, 557
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
magnetohydrodynamic water treat device, 211
NaCl pressure influence on Al, 470
passive film anal on 18-10 and Mo SS, 141
polarization eval of conc HCl at 93 C, 729
review, localized attack on Al alloy, 277
Ti passivity in phosphoric acid, 740

IRON
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
chemistry, electrochem hot corrosion, 568
electrochemical monitor in molten salt, 578
piezoelectric eval of corrosion rates, 345
removing S-containing inhib from steel, 427
Si-carbide fiber—Al powder composite, 718
spectroscopic anal thin films on iron, 476
trace element infl on cyclic wet and dry, 249

IRON OXIDES
magnetohydrodynamic water treat device, 211
spectroscopic anal thin films on iron, 476
steel passivation in ammonium EDTA sol, 613
weathering steel highway bridge attack, 447

J, K

Joints and fasteners: thermophilic bacterium accel of attack, 533

KINETICS
carburization of hi-temp alloys calc, 390
electrochem monitor in molten salt, 578
H adsorption on steels with H reaction, 242
H evolution on steel, tin in seawater, 51
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
NaCl pressure infl on Al, 470
noniterating calc of polar data, 151
piezoelectric eval of corr rates, 345

Kraft process, paper industry: silver sulfide electrode vs alk sulfides, 409

L

Laser processing: SS passivity infl by composition, micrst, 376

LATTICE
boron fluoride implantation of In 600, 557
review, localized attack on Al, 277

Linear polar rate tests: polarization eval of conc HCl at 93 C, 729
Lithium carbonate: electrochem monitor in molten salt, 578
Lithium causes: electrochem monitor in molten salt, 578
Lithium hydroxide: calc pH of hi-temp NH_4, NH_4-chloride sol, 549
Lithium, materials: AlLi alloy, infl addition of Ge, 416
Lithium sulfate: electrochem monitor in molten salt, 578

LOCALIZED MATERIALS EFFECTS
review, localized attack on Al, 277
Whitney 85 Lecture—Corros products, 125

Low temperatures: field Cu-$CuSO_4$ electrode life improvement, 435

M

Magnesium: galvanic attack by graphite on Mg, 609

MAGNESIUM CHLORIDE
SCC of an amorphous FeCrNiW alloy, 504
SCC of CrNi martensitic SS in Mg chloride, 592
SS and Cr, Ni, Mo vs SCC in Cl, 44
Whitney 85 Lecture—corros products, 125
304 SCC slip dissol—repassivation mode, 10

Magnetic: magnetohydrodynamic water treat device, 211

MAGNETITE
polar eval of conc HCl at 93 C, 729
spectroscopic anal thin films on iron, 476
steel passivation in ammonium EDTA sol, 613
weathering steel highway bridge attack, 447

MANGANESE
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
composition infl on SS sensitization, 27
conventional, quick-cooled 303 compared, 161
H cracking of hi-strength line pipe steel, 337
SS passivity infl by composition, micrst, 376

MANGANESE SULFIDES
conventional, quick-cooled 303 compared, 161
SS passivity infl by composition, micrst, 376

MARINE ATMOSPHERIC
Al, Zn, AlZn atmos corros products, 422
AlZnMgCu alloy stress tests in sea atmos, 663

MASS TRANSFER
H and O_2 vs 304 SS in hi-temp water, 696
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633
O_2 role in mass transfer in slurry, 514

Mechanical destructive testing: H cracking of hi-strength line pipe steel, 337
Metal clad metals: clad, welded austenitic SS in boiling acid, 1

METAL COATINGS
Al, Zn, AlZn atmos corros products, 422
SCC of an amorphous FeCrNiW alloy, 504

Metal containers, metal aerosol container corros test, 622

METAL PIPES
H cracking of hi-strength line pipe steel, 337
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
max H_2S pressure for hydrogen cracking, 36

Metal powders: conventional, quick-cooled 303 compared, 161
Methane: H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
Methyl alcohols: Ni vs methanol and H_2O, chlorides, H+ ions, 156

Microbiological: test method for microbial corros, 669
Microorganisms: marine bacterium accel attack on 304 SS, 204
Microscopes electronic: AlLi alloy, infl addition of Ge, 416

MICROSCOPIC, OPTICAL INSTRUMENTATION
conventional, quick-cooled 303 compared, 161
NiMo, NiTi amorphous thin film eval, 236
SCC of CrNi martensitic SS in Mg chloride, 592

MICROSTRUCTURE
AlLi alloy, infl addition of Ge, 416
Alloy 600 micrst infl on attack, 15
comparison of grain boundary deplet test, 522
electrochem detect IG attack on duplex S, 537
electrochem tests in 600 suscept to IGA, 289
H cracking of hi-strength line pipe steel, 337
hi-strength steels—improved H_2S resistant, 54
SCC of age hardenable NiFeCr alloys, 352
SCC of CrNi martensitic SS in Mg chloride, 592
SCC of In 600, 690 in hi-temp NaOH, 368
SS passivity infl by composition, micrst, 376
sulfide stress cracking of low alloy steel, 222
Zn micrst infl on steel in concr, 187

Milling: phos segregation tests for NiCrMoV rotor, 180
Mining: grinding media vs sulfide ores electrical, 440
Mining equipment: slurries vs cast iron, steel grinding ball, 312
Mixed electrode phenomena: disc-cathodic protection mechanism, 430

MIXTURES
galvanic attack by graphite on Mg, 609
Si-carbide fiber—Al powder composite, 718

MOLTEN SALTS
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578

Molybdate inhibitors: molybdate inhib in deaerated, low O_2 water, 542

MOLYBDENUM
chemistry, electrochem hot corros, 568
clad, welded austenitic SS in boiling acid, 1
comparison of grain boundary deplet test, 522
electrochem monitor in molten salt, 578
NiMo, NiTi amorphous thin film eval, 236
passive film anal on 18-10 and Mo SS, 141
single crystal Ni-base alloys vs 2000 F air, 708
SS passivity infl by composition, micrst, 376
SS and Cr, Ni, Mo vs SCC in Cl, 44
trace element infl on cyclic wet and dry, 249
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633

MORPHOLOGY
cath prot vs cracking of 304 in NaCl sol, 362
Ni pitting vs NaCl static and flowing, 646
weathering steel highway bridge attack, 447

N

NACE HYDROGEN SULFIDE CRACKING TEST
H cracking of hi-strength line pipe steel, 337
SCC of A516 steel in 92 C caustic sulfide, 63
sulfide stress cracking of low alloy steel, 222

NACE standards and reports: disc, H role in H_2S cracking of low-alloy, 498
Natural gases: H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
Neutral pH: alloy 600 micrst infl on attack, 15

NICKEL
auxiliary electrode to measure resistance, 432
calc pH of hi-temp NH_4, NH_4-Cl sol, 549
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578
Ni pitting vs NaCl static and flowing, 646
Ni vs methanol and H_2O, chlorides, H+ ions, 156
NiMo, NiTi amorphous thin film eval, 236
SCC of Cr-Ni martensitic SS in Mg chloride, 592
SS and Cr, Mi, Mo vs SCC in Cl, 44
sulfide stress cracking of low alloy steel, 222

NICKEL ALLOYS
Ni vs methanol and H_2O, chlorides, H+ ions, 156
single crystal Ni-base alloys vs 2000 F air, 708

Nickel coatings: alternate immersion tests of coated steel, 255

NICKEL 200 to 270
anodic films on Ni vs secondary passivity, 307
thermophilic bacterium accel of attack, 533

NICKEL-CHROMIUM-IRON ALLOYS
carburization of hi-temp alloys calc, 390
Ni-base weld metal infl on 316 in boiling, 682

NICKEL-CHROMIUM-MOLYBDENUM ALLOYS
phos segregation tests for NiCrMoV rotor, 180
sulfide stress cracking of low alloy steel, 222

Nicor-silal cast iron: slurries vs cast iron, steel grinding ball, 312

NICKEL SULFATE
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578

NIOBIUM
H cracking of hi-strength line pipe steel, 337
hi-strength steels—improved H_2S resistance, 54
Nb, Ta vs hydrobromic acid sol, 492
Ti passivity in phosphoric acid, 740

NITRATES, BASES AND SALTS
chemistry, electrochem hot corros, 568
molybdate inhib in deaerated, low O_2 water, 542
phos segregation tests for NiCrMoV rotor, 180
review, localized attack on Al, 277

NITRIC ACIDS
clad, welded austenitic SS in boiling acid, 1
conventional, quick-cooled 303 compared, 161
NiMo, NiTi amorphous thin film eval, 236
Whitney 85 Lecture—corros products, 125

Nitrogen compounds inhibitors: organic adsorbants infl on 7075-T651 SCC, 601

NITROGEN
composition infl on SS sensitization, 27
grinding media vs sulfide ores electrical, 440
N vs 304 SCC in hi-temp sulfate sol, 197
SS passivity infl by composition, micrst, 376

Nitrous oxide: trace element infl on cyclic wet and dry, 249
Nonaqueous liquids: brass attack in aprotic solvent and water, 640

NUCLEAR GRADE STAINLESS STEEL
Ni-base weld metal infl on 316 in boiling, 682
polar effects in galvanic corros, 329
trace element infl on cyclic wet and dry, 249

NUCLEAR REACTORS
alternate water chemistry tests in BWR, 263
H and O_2 vs 304 SS in hi-temp water, 696
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
removing S-containing inhib from steel, 427
SCC of age hardenable NiFeCr alloys, 352

Nucleation of dissolved solids, magneto-hydrodynamic water treat device, 211

O

Oils, mineral: metal aerosol container corros test, 622
Oils, vegetable: metal aerosol container corros test, 622

ON-SITE OR PILOT PLANT TESTING
alternate water chemistry tests in BWR, 263
field Cu-$CuSO_4$ electrode life improvement, 435
phos segregation tests for NiCrMoV rotor, 180

Open circuit potential tests: steel transient polar currents in NaCl, 669

OPTICAL INSTRUMENTATION TESTING
H cracking of hi-strength line pipe steel, 337
phos segregation tests for NiCrMoV rotor, 180
potentials of 304 SS SCC in 200 C NaCl, 456

OPTICAL NONDESTRUCTIVE TESTING
AlZnMgCu alloy stress tests in sea atmos, 663
metal aerosol container corros test, 622
polar eval of conc HCl at 93 C, 729
Si-carbide fiber-Al powder composite, 718

ORE MINING
grinding media vs sulfide ores electrical, 440
slurries vs cast iron, steel grinding ball, 312

Organic deposits: organic adsorbants infl on 7075-T651 SCC, 601

ORIENTATION OF SURFACES
Al, Zn, AlZn atmos corros products, 422
Si-carbide fiber-Al powder composite, 718
weathering steel highway bridge attack, 447

ORIENTATION, GRAIN
AlZnMgCu alloy stress tests in sea atmos, 663
Si-carbide fiber-Al powder composite, 718

Oxalic acid: electrochem detect IG attack on duplex S, 537

OXIDATION
alternate immersion tests of coated steel, 255
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578
grinding media vs sulfide ores electrical, 440
H and O_2 vs 304 SS in hi-temp water, 696
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
metal aerosol container corros test, 622
NaCl pressure infl on Al, 470
Nb, Ta vs hydrobromic acid sol, 492
removing S-containing inhib from steel, 427
review, localized attack on Al, 277
single crystal Ni-base alloys vs 2000 F air, 708
spectroscopic anal thin films on iron, 476
weathering steel highway bridge attack, 447
zinc effects on SS O_2 films, 546

OXIDES, BASES AND SALTS
Al oxide films dissol in KF, 324
anodic films on Ni vs secondary passivity, 307
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578
electronic barrier at Al-semiconductor, 700
H and O_2 vs 304 SS in hi-temp water, 696
removing S-containing inhib from steel, 427
review, localized attack on Al, 277
single crystal Ni-base alloys vs 2000 F air, 708
SS passivity infl by composition, micrst, 376
Ti passivity in phosphoric acid, 740

OXYGEN
alternate water chemistry tests in BWR, 263
CERT data on sensitized 304 re-analyzed, 482
H and O_2 vs 304 SS in hi-temp water, 696
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
magnetohydrodynamic water treat device, 211
molybdate inhib in deaer, low O_2 water, 542
NaCl pressure infl on Al, 470
Ni-base weld metal infl on 316 in boiling, 682
potentials in boiler water vs O_2 content, 120
potentials of 304 SS SCC in 200 C NaCl, 456
silicon infl on IGSCC of AISI 304 steels, 678
test method for microbial corros, 689
thermophilic bacterium accel of attack, 533

Steels, NiCr, Inconel X-782: SCC of age hardenable NiFeCr alloys, 352

STEELS, NiCr, INCONEL 600
Alloy 600 microst infl on attack, 15
alternate water chemistry tests in BWR, 263
boron fluoride implantation of In 600, 557
electrochem tests in 600 suscept in IGA, 289
electrochem monitor in molten salt, 578
SCC of In 600, 690 in hi-temp NaOH, 368

Steels, NiCr, Inconel 625 Haynes: CuNi, NiAl, C steel, Ti, Zn vs seawater, 462

STEELS, NiCr, OTHER
alternate water chemistry tests in BWR, 263
Cl in hi-temp water vs SCC of In X750, 531
Ni-base weld metal infl on 316 in boiling, 682
SCC of age hardenable NiFeCr alloys, 352
SCC of In 600, 690 in hi-temp NaOH, 368

STEELS, NICKEL
SCC of age hardenable NiFeCr alloys, 352
sulfide stress cracking of low alloy steel, 222

STEELS, OTHER
potentials in boiler water vs O_2 content, 120
Si vs pitting of 18-8 SS, 147
SS passivity infl by composition, microst, 376
SS microbial pitting mechanism, 489
Whitney 85 Lecture—corros products, 125

Strain, mechanical methods: 304 SCC slip dissol-repassivation mode, 10
Strauss test: comparison of grain boundary deplet test, 522

STRESS CELLS
conventional, quick-cooled 303 compared, 161
Ni-base weld metal infl on 316 in boiling, 682
polar effects in galvanic corros, 329
resid stress on steels info on potential, 318
Si-carbide fiber-Al powder composite, 718
slurries vs cast iron, steel grinding ball, 312
test method for microbial corros, 689
Zn microst infl on steel in concrete, 187

STRESS CORROSION CRACKING
Alloy 600 microst infl on attack, 15
AlZnMgCu alloy stress testc in sea atmos, 663
cath prot vs cracking of 304 in NaCl sol, 362
CERT data on sensitized 304 re-analyzed, 482
Cl in hi-temp water vs SCC of In X750, 531
composition infl on SS sensitization, 27
corros behavior of Al IN-9021 alloy, 554
CuAg SCC in ammonia sol, 299
disc, H role in H_2S cracking of low-alloy, 498
electrochem tests in 600 suscept to IGA, 289
H and O_2 vs 304 SS in hi-temp water, 696
hi-strength steels—improved H_2S resistance, 54
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
loading mode infl on H-aided fracture, 585
N vs 304 SCC in hi-temp sulfate sol, 197
Ni-base weld metal infl on 316 in boiling, 682
organic adsorbants infl on 7075-T651 SCC, 601
potentials of 304 SS SCC in 200 C NaCl, 456
review, localized attack on Al, 277
SCC of age hardenable NiFeCr alloys, 352
SCC of an amorphous FeCrNiW alloy, 504
SCC of A516 steel in 92 C caustic sulfide, 63
SCC of CrNi martensitic SS in MgCl, 592
SCC of In 600, 690 in hi-temp NaOH, 368
SCC of sensitized 304 in hi-temp Na_2SO_4, 559
SS and Cr, Ni, Mo vs SCC in Cl, 44
sulfide stress cracking of low alloy steel, 222
Whitney 85 Lecture—corros products, 125
304 SCC slip dissol-repassivation mode, 10

STRESS CORROSION CRACKING TESTS
AlZnMgCu alloy stress tests in sea atmos, 663
organic adsorbants infl on 7075-T651 SCC, 601
SCC of an amorphous FeCrNiW alloy, 504
SCC of A516 steel in 92 C caustic sulfide, 63

STRESS, ACCELERATED LAB TESTING
alternate water chemistry tests in BWR, 263
Cert data on sensitized 304 re-analyzed, 482
N vs 304 SCC in hi-temp sulfate sol, 197
potentials of 304 SS SCC in 200 C NaCl, 456
SCC of In 600, 690 in hi-temp NaOH, 368
SS and Cr, Ni, Mo, vs SCC in Cl, 44

Stress, mechanical methods: SCC of In 600, 690 in hi-temp NaOH, 368

STRESSES
AlZnMgCu alloy stress tests in sea atmos, 663
CERT data on sensitized 304 re-analyzed, 482
disc, H role in H_2S cracking of low-alloy, 498
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
loading mode infl on H-aided fracture, 585
SCC of an amorphous FeCrNiW alloy, 504
steel transient polar currents in NaCl, 669

SULFATES, BASES AND SALTS
Al, Zn, AlZn atmos corros products, 422
anodic films on Ni vs secondary passivity, 307
CERT data on sensitized 304 re-analyzed, 482
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578
molybdate inhib in deaer, low O_2 water, 542
N vs 304 SCC in hi-temp sulfate sol, 197
review, localized attack on Al, 277
SCC of sensitized 304 in hi-temp Na_2SO_4, 559
slurries vs cast iron, steel grinding ball, 312
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633

SULFIDES, BASES AND SALTS
chemistry, electrochem hot corros, 568
conventional, quick-cooled 303 compared, 161
grinding media vs sulfide ores electrical, 440
review, localized attack on Al, 277
SCC of A516 steel in 92 C caustic sulfide, 63

silver sulfide electrode vs alk sulfides, 409
SS passivity infl by composition, micrst, 376
SS microbial pitting mechanism, 489
sulfide stress cracking of low alloy steel, 222
sulfides vs 304 in buffered neutral media, 240
trace element infl on cyclic wet and dry, 249

Sulfonates: organic adsorbants infl on 7075-T651 SCC, 601

SULFUR
Al, Zn, AlZn atmos corros products, 422
chemistry, electrochem hot corros, 568
disc, H role in H_2S cracking of low-alloy, 498
H cracking of hi-strength line pipe steel, 337
hi-strength steels—improved H_2S resistance, 54
removing S-containing inhib from steel, 427
weathering steel highway bridge attack, 447

SULFUR DIOXIDE
chemistry, electrochem hot corros, 568
weathering steel highway bridge attack, 447

SULFURIC ACIDS
boron fluoride implantation of In 600, 557
boundary element anal of electrode potential, 654
clad, welded austenitic SS in boiling acid, 1
conventional, quick-cooled 303 compared, 161
Ni vs methanol and H_2O, chlorides, H+ ions, 156
Ni-base weld metal infl on 316 in boiling, 682
polar effects in galvanic corros, 329
SS passivity infl by composition, micrst, 376
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633

SUPERALLOYS
chemistry, electrochem hot corros, 568
single crystal Ni-base alloys vs 2000 F air, 708

SURFACE EFFECTS
boron fluoride implantation of In 600, 557
chemistry, electrochem hot corros, 568
electronic barrier at Al-semiconductor, 700
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
metal aerosol container corros test, 622
Ni pitting vs NaCl static and flowing, 646
O_2 role in mass transfer in slurry, 514
phosphate inhibitors for cooling systems, 233
polar eval of conc HCl at 93 C, 729
resid stress on steels info on potential, 318
SCC of an amorphous FeCrNiW alloy, 504
Si-carbide fiber-Al powder composite, 718
SS passivity infl by composition, micrst, 376
SS and Cr, Ni, Mo vs SCC in Cl, 44
sulfide stress cracking of low alloy steel, 222
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633
zinc effects on SS O_2 films, 546

SURFACE PREPARATION
electrochem tests in 600 suscept in IGA, 289
electronic barrier at Al-semiconductor, 700
removing S-containing inhib from steel, 427

Surveillance: electrochem monitor in molten salt, 578
Synergism: molybdate inhib in deaer, low O_2 water, 542

SYNERGISTIC EFFECTS
molybdate inhib in deaer, low O_2 water, 542
slurries vs cast iron, steel grinding ball, 312
trace element infl on cyclic wet and dry, 249

T

TAFEL CALCULATIONS
disc-cathodic prot mechanism, 430
H and O_2 vs 304 SS in hi-temp water, 696

TANTALUM
Nb, Ta vs hydrobromic acid sol, 492
single crystal Ni-base alloys vs 2000 F air, 708

TEMPER EMBRITTLEMENT
chemistry, electrochem hot corros, 568
electrochem monitor in molten salt, 578

TEMPERATURE—0 TO 22 C (32 TO 72 F)
electrochem tests in 600 suscept to IGA, 289
H evolution on steel, tin in seawater, 51

TEMPERATURE—22 TO 100 C (72 TO 212 F)
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
CuNi, NiAl, C steel, Ti, Zn vs seawater, 462
electrochem tests in 600 suscept to IGA, 289
H and O_2 vs 304 SS in hi-temp water, 696
H evolution on steel, tin in seawater, 51
HEDP inhib of C steel in 0.3% NaCl, 272
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
metal aerosol container corros test, 622
molybdate inhib in deaer, low O_2 water, 542
polar eval of conc HCl at 93 C, 729
SCC of A516 steel in 92 C caustic sulfide, 63
silver sulfide electrode vs alk sulfides, 409
thermophilic bacterium accel of attack, 533
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633
304 SCC slip dissol-repassivation mode, 10

TEMPERATURE—100 TO 200 C (212 TO 392 F)
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
H and O_2 vs 304 SS in hi-temp water, 696
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
polar eval of conc HCl at 93 C, 729
potentials of 304 SS SCC in 200 C NaCl, 456
SCC of sensitized 304 in hi-temp Na_2SO_4, 559
silver sulfide electrode vs alk sulfides, 409
spectroscopic anal thin films on iron, 476

TEMPERATURE—200 TO 300 C (392 TO 572 F)
Alloy 600 micrst infl on attack, 15
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
Cl in hi-temp water vs SCC of In X750, 531
H and O_2 vs 304 SS in hi-temp water, 696
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
N vs 304 SCC in hi-temp sulfate sol, 197
Ni-base weld metal infl on 316 in boiling, 682
potentials in boiler water vs O_2 content, 120
SCC of In 600, 690 in hi-temp NaOH, 368
SCC of sensitized 304 in hi-temp Na_2SO_4, 559
silicon infl on IGSCC of AISI 304 steels, 678
zinc effects on SS O_2 films, 546

Temperature—300 to 400 C (572 to 752 F): SCC of age hardenable NiFeCr alloys, 352
Temperature—500 to 600 C (932 to 1112 F): electrochem monitor in molten salt, 578
Temperature—800 to 900 C (1471 to 1652 F): carburization of hi-temp alloys calc, 390

TEMPERATURE CAUSES
cath prot vs cracking of 304 in NaCl sol, 362
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
Nb, Ta vs hydrobromic acid sol, 492
Ni vs methanol and H_2O, chlorides, H+ ions, 156
review, localized attack on Al, 277
test method for microbial corros, 689

Temperature—−100 to −20 C (−148 to +8 F): field Cu-$CuSO_4$ electrode life improvement, 435
Tensile destructive tests: loading mode infl on H-aided fracture, 585

TENSILE STRESSES
alternate water chemistry tests in BWR, 263
resid stress on steels info on potential, 318
silicon infl on IGSCC of AISI 304 steels, 678
steel transient polar currents in NaCl, 669
Whitney 85 Lecture—corros products, 125

Text analysis data access: moniterating calc of polar data, 151

THERMODYNAMICS
carburization of hi-temp alloys calc, 390
H_2S, H_2S-CO_2-CH_4-C_3H_8 vs carbon steels, 398
Nb, Ta vs hydrobromic acid sol, 492

Thermophilic bacteria: accel of attack, 533

THIOSULFATES
slurries vs cast iron, steel grinding ball, 312
SS microbial pitting mechanism, 489

TIME EFFECTS
AlZnMgCu alloy stress tests in sea atmos, 663
Si-carbide fiber-Al powder composite, 718
trace element infl on cyclic wet and dry, 249

Time less than 1 day (24 h): polar eval of conc HCl at 93 C, 729

TIME LESS THAN 12 WEEKS (2000 h)
carburization of hi-temp alloys calc, 390
SCC of age hardenable NiFeCr alloys, 352

TIME LESS THAN 4 WEEKS (6.9 × 10 h)
thermophilic bacterium accel of attack, 533
zinc effects on SS O_2 films, 546

TIME LESS THAN 5 YEARS (4.4 × 10K h)
Al, Zn, AlZn atmos corros products, 422
AlZnMgCu alloy stress tests in sea atmos, 663

TIME LESS THAN 52 WEEKS (8.7 × 100 h)
metal aerosol container corros test, 622
SCC of age hardenable NiFeCr alloys, 352

TIME LESS THAN 7 DAYS (168 h)
trace element infl on cyclic wet and dry, 249
O_2 role in mass transfer in slurry, 514

Time over 10 years: review, localized attack on Al, 277
Time, testing: CERT data on sensitized 304 re-analyzed, 462

TIN
electronic barrier at Al-semiconductor, 700
H evolution on steel, tin in seawater, 51

TIN COATINGS
electronic barrier at Al-semiconductor, 700
metal aerosol container corros test, 622

Tin salts: electronic barrier at Al-semiconductor, 700

TITANIUM
composition infl on SS sensitization, 27
CuNi, NiAl, C steel, Ti, Zn vs seawater, 462
polar effects in galvanic corros, 329
single crystal Ni-base alloys vs 2000 F air, 708
Ti passivity in phosphoric acid, 740
trace element infl on cyclic wet and dry, 249

Topographic analysis: loading mode infl on H-aided fracture, 585
Torsional stress: loading mode infl on H-aided fracture, 585

TRANSGRANULAR CRACKING
cath prot vs cracking of 304 in NaCl sol, 362
loading mode infl on H-aided fracture, 585
N vs 304 SCC in hi-temp sulfate sol, 197
SCC of age hardenable NiFeCr alloys, 352
SS and Cr, Ni, Mo vs SCC in Cl, 44
Whitney 85 Lecture—corros products, 125

Transpassivity: SCC of sensitized 304 in hi-temp Na_2SO_4, 559

TUNGSTEN
chemistry, electrochem hot corros, 568
SCC of an amorphous FeCrNiW alloy, 504
single crystal Ni-base alloys vs 2000 F air, 708
SS passivity infl by composition, micrst, 376

TUNNELING
passive film anal on 18-10 and Mo SS, 141
SCC of age hardenable NiFeCr alloys, 352

Turbines, gas: chemistry, electrochem hot corros, 568
Turbulence: Ni pitting vs NaCl static and flowing, 646

U,V

Ultraviolet: HEDP inhib of C steel in 0.3% NaCl, 272

UNDERWATER ENVIRONMENTS
magnetohydrodynamic water treat device, 211
molybdate inhib in deaer, low O_2 water, 542

Vacancies: Al oxide films dissol in KF, 324
Vanadium: hi-strength steels—improved H_2S resistance, 54
Vaporizing application of metal coatings: electronic barrier at Al-semiconductor, 700

VELOCITY
CuNi, NiAl, C steel, Ti, Zn vs seawater, 462
magnetohydrodynamic water treat device, 211
Ni pitting vs NaCl static and flowing, 646

O_2 role in mass transfer in slurry, 514
slurries vs cast iron, steel grinding ball, 312
steel passivation in ammonium EDTA sol, 613
thermophilic bacterium accel of attack, 533
velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633

Vibrating or rotating electrodes: velocity effects H_2SO_4 vs 26Cr-1Mo alloy, 633
Viscosity: metal aerosol container corros test, 622
Voltage shift: disc-cathodic prot mechanism, 430

W-Z

Water: metal aerosol container corros test, 622
Wedging: Whitney 85 Lecture—corros products, 125

WEIGHT LOSS
AlLi alloy, infl addition of Ge, 416
Alloy 600 microst infl on attack, 15
brass attack in aprotic solvent and water, 640
disc-cathodic prot mechanism, 430
electrochem monitor in molten salt, 578
electronic barrier at Al-semiconductor, 700
HEDP inhib of C steel in 0.3% NaCl, 272
molybdate inhib in deaer, low O_2 water, 542

Nb, Ta vs hydrobromic acid sol, 492
O_2 role in mass transfer in slurry, 514
polar eval of conc HCl at 93 C, 729
SCC of A516 steel in 92 C caustic sulfide, 63
Si-carbide fiber-Al powder composite, 718
single crystal Ni-base alloys vs 2000 F air, 708
slurries vs cast iron, steel grinding ball, 312

Welding fusion zone: SCC of A516 steel in 92 C caustic sulfide, 63

WELDING, JOINING
clad, welded austenitic SS in boiling acid, 1
corros behavior of Al IN-9021 alloy, 554
electrochem detect IG attack on duplex S, 537
H cracking of hi-strength line pipe steel, 337
IGSCC of 304 vs O_2, H_2O_2, H_2O impurities, 169
metal aerosol container corros test, 622
SCC of A516 steel in 92 C caustic sulfide, 63

X-RAY NONDESTRUCTIVE TESTING
anodic films on Ni vs secondary passivity, 307
carburization of hi-temp alloys calc, 390
electronic barrier at Al-semiconductor, 700

NaCl pressure infl on Al, 470
Nb, Ta vs hydrobromic acid sol, 492
removing S-containing inhib from steel, 427
resid stress on steels info on potential, 318
single crystal Ni-base alloys vs 2000 F air, 708
weathering steel highway bridge attack, 447

ZINC
Al, Zn, AlZn atmos corros products, 422
boundary element anal of electrode potential, 654
CuNi, NiAl, C steel, Ti, Zn vs seawater, 462
zinc effects on SS O_2 films, 546

ZINC METAL COATINGS
alternate immersion tests of coated steel, 255
Zn microst infl on steel in concrete, 187

Zinc salts: zinc effects on SS O_2 films, 546
Zinc, inhibitors containing: HEDP inhib of C steel in 0.3% NaCl, 272

ZIRCONIUM
calc pH of hi-temp NH_4, NH_4-chloride sol, 549
SCC of age hardenable NiFeCr alloys, 352
Ti passivity in phosphoric acid, 740

Call toll-free 800-521-3044. In Michigan, Alaska and Hawaii call collect 313-761-4700. Or mail inquiry to: University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

Simulate Field Conditions In The Laboratory!

CORROCELL®

The Compact Corrosion Laboratory For One-Side Test Panel Exposure

- FOR Protective Coatings and Linings Meets:
  NACE Standard TM-01-74
  ASTM Standard C-868
- FOR Rigid Materials of Construction Meets:
  ASTM Standard D-4398
